CORPORATE OVERVIEW

LMMW Group Ltd. (LMMW) provides energy, facility, and training services that optimize performance of buildings, processes, and people.

We help our clients improve energy efficiency, lower carbon emissions, reduce costs, and optimize operations.

Headquartered in Nova Scotia, Canada, LMMW launched in 2022 and is led by Chad Wiesner and Marc MacDougall, in partnership with **Lindsay Construction** - the largest construction firm in Atlantic Canada established in 1959.

OUR SERVICES

DISCOVER

Energy & Facility Condition Assessments (EFCA)

Renewable Energy Assessments

OPTIMIZE

Deep Energy Retrofits

Building Upgrades

Solar PV

Renewable Energy Systems

Energy-as-a-Service

MAINTAIN

Preventative Maintenance Plans

Facility Repairs & Building Services

Assessment Technology
(Drone, Thermography, 3D Spatial Scanning)

TRAIN

Professional Development

Virtual Campus

Process Optimization

Job Competency Roadmapping

Online Courses

Our **Discover** phase combines energy and facility condition assessments with decarbonization strategy to deliver a practical, actionable plan ("roadmap") for the facility to be optimized. The report(s) provided typically contain both energy efficiency and facility improvement recommendations that help determine optimal project scope.

Our **Optimize** phase is where we implement recommended energy retrofit and facility upgrades. By engaging our team involved with the prior Discover phase of the project, the project implementation team gains a better understanding of the design and objectives, which helps inform project execution. LMMW offers a collaborative procurement process, enabling us to evaluate multiple equipment and subtrade options.

Our **Maintain** phase ensures implemented equipment and the entire building is properly maintained. LMMW's objective is to build long-term relationships with our clients, so **L360 Preventative Maintenance Plans** are designed to help building owners affordably (and proactively) maintain their assets and extend facility lifespan.

Our **Training** division, the **E360 Institute**, offers professional development courses (in-person and online), process optimization, and virtual platforms focused on delivering practical outcomes that provide a positive return on investment for organizations.
